I'm not sure this is one we can use. If not, please let me know what she can do to improve it and I will advise her.

Thanks,
Kara

Dear Kara,

Here are my comments on the Southern Delivery System.
I think that it is downright irresponsible of us to seek new water sources until we make a **SERIOUS** effort in conserving the water that we already have. We spend millions of dollars on these water projects, and then squander the water. It is insane! I see hundreds of incidents every day where water is being wasted: sprinklers on in the middle of the day, in the heat & wind, blowing onto the street. Why does the city continue to plant bluegrass in parks? I could go on and on..... We need to conserve the water we currently have!!!

Sincerely,
Nicole Rosa
