Kara,

I live in Pueblo West at the end of Greenbriar Drive. The existing Pueblo West 36" pipeline comes right next to my house. I am concerned that what I have been able to view on your website does not show me exactly where the proposed route is in relation to Pueblo West. I am very concerned that it should be as close to the East border of Pueblo West as possible and not have to go through any of the Parks land by my house. (The existing line does).

I request details ASAP. Also, let me make it clear that if the proposal is to put this line anyplace but along the most Eastern edge of Pueblo West, I will be a "problem".

Please add me to your mailing list.
