Subject Re: Colorado Springs Dam Water

Mr. Barbour,
Thank you for your comment. I will make sure it is included in the review process.

Best,
Kara

I believe that Colorado Springs should use the money that they want to spend on a new pipe line on a dam on Fountain Creek. Let them recycle the contaminated water that they "accidentally" let go and drink that. Judging by their actions, the water coming down the Fountain must be ok for every one in the Arkansas Valley to drink, so let them drink it as well. Colorado Springs has a history of not caring about what happens to the Pueblo area ,unless it's something they want , like now. I would ask that you deny Colorado Springs their request for a new pipe line from the Pueblo Res. and have them build a dam on the Fountain and let them drink their own Dam water!

Respectfully , Ron Barbour
