Where is the SDS going to start?

Will it be on the west side of the cement Pueblo dam?

Will it run north from there ABOVE OR BELOW ground?

Will it run directly under Liberty Point Lookout?

If below ground, how wide of a path of natural ground cover will be disturbed?

Will a permanent road be visible after construction?

If the pipe is above ground, I do not want it in Pueblo West.

If it is below ground in the valley below the Liberty Point Lookout, I do not want it.

If it is going to disturb a wide path of natural ground cover in Pueblo West, I do not want it.

Thank you,

Jill Ball  
resident of Pueblo West since 1986
