This controversy on Colo. Springs' SDS pipeline is a NO BRAINER.

Colo. Springs has an arrogant disregard for sewerage-up the Fountain Creek.

They have a cavalier attitude for the towns and cities that are being "dumped on" by the crud coming down the Fountain Creek. Colo. Springs/Aurora would be screaming if the cities up north were dumping on them. Why doesn't Colo. Springs act like a good neighbor and take care of its own sewage, instead of passing it on to the communities who have little resources to handle the pollution Colo. Springs sends to them.

I think SDS pipeline should come from the #6 alternative ... even better ... it should come BELOW the confluence of the Fountain Creek/Arkansas.

Only then would Colo. Springs definitely clean up their sewage mess super-fast.
