Managing Water in the West

We Invite Your Comments!

Southern Delivery System Draft Environmental Impact Statement

Name*	Martin McClelland	Date	4/2/08
Company /Organization			
Street Address	30 Apollo Lane		
City, State, Zip	Pueblo, Co 81001		
E-mail	Marty.McClelland@pobox.com		

* Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Comments are considered substantive if they:

- Question, with reasonable basis, the accuracy of the information in the document
- Question, with reasonable basis, the adequacy of the environmental analysis
- Present reasonable alternatives other than those presented in the Environmental Impact Statement
- Cause changes or revisions in the alternatives
- Provide new or additional information relevant to the analysis

Would like your name and address withheld from public disclosure*? YES NO

Comments: As a property-owner living near the Fountain River in Pueblo, my primary concern is the impact on water quality, increased flows and flooding of the Fountain.

I have a negative comment regarding the "Socioeconomics and Land Use" graphic. It indicates that the preferred alternative #1 will have "No Impact" to Pueblo County. This is incredulous! Such a massive project having no impact?

Bureau of Reclamation

Comments (continued):

In my opinion each of the alternatives will have major Socioeconomic impact to Pueblo County and to the water flows and quality of the Fountain.

I would like to express a strong preference for Alternative #6 since it is most likely to influence the building of a flood control dam between Colo Spgs and Pueblo and the construction of effective water treatment plants for the Fountain return flow.

Alternative #6 also helps to ensure an adequate water flow of the Arkansas River through the city of Pueblo.

Thank You.

Thank you for your comments
