Managing Water in the West

We Invite Your Comments!

Southern Delivery System Draft Environmental Impact Statement

* Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Comments are considered substantive if they:

- Question, with reasonable basis, the accuracy of the information in the document
- Question, with reasonable basis, the adequacy of the environmental analysis
- Present reasonable alternatives other than those presented in the Environmental Impact Statement
- Cause changes or revisions in the alternatives
- Provide new or additional information relevant to the analysis

Would like your name and address withheld from public disclosure? YES NO

Comments: I think the people effected should've been contacted & let know that they could be effected by one of the options so they could voice there opinion. I didn't like the fact that alot of the people would just point to another & say that would be the person to ask, was alot of that taking place. Proposals/Boards could've been color coded better so it would be better understood. Left alot to interpetate.
