I am addressing your DEIS both  
from a lower valley water quality advocate  
and a concerned citizen.

How can you (EPA - Col. Dept of Health)  
force the lower valley users to spend money  
they don't have to clean the water + then  
allow the front range to take pristine  
water + send their waste down the Front Range  
for us to clean up. Where in your book of  
logic can I find these answers.

Respectfully  
Lobby Hancock
