RE: ENVIRONMENTAL Disaster!

AKA proposed Southern Delivery System for Colorado Springs

Please stop this proposed RAPE AND PILLAGE of SE Colorado IMMEDIATELY.

Problem A: Colorado Springs wants more water.

Problem B: Colorado Springs needs to "fix" its sewer system so that it is not flooding & contaminating Fountain Creek, the Arkansas River and all of SE Colorado.

Solution: Recycle all sewer water in Colorado Springs into potable water again which solves Problem A.

"BURN" the sewer sludge and other NON-Recyclable trash in Colorado Springs and generate electricity with the "energy" produced; Eureka! No flooding; No Contamination, and electricity which is ENVIRONMENTALLY RESPONSIBLE. and the actual dollars for such a system should be better, both short term and long term.
